```python
1    #import arcpy
2    import arcpy
3
4    info = arcpy.Describe("C:\\python\\Mars\\Mars.gdb\\Curiosity_Route_Points")
5    print "The Name is: " + info.name
6    print "The Data Type is: " + info.dataType
7    print "The Shape Type is: " + info.shapeType
8
9    #write to DatasetInfo.txt
10   file = open("C:\\python\\DatasetInfo.txt", "w")
11   file.write("The Name is: " + info.name)
12   file.write("The Data Type is: " + info.dataType)
13   file.write("The Shape Type is: " + info.shapeType)
14
15   #close file
16   file.close()
```
